WORK EXPERIENCE

TheyDo — Netherlands / remote
Senior Frontend Engineer — Jul 2024 – Apr 2026

- Built a Notion-like rich text editor using Vue and Tiptap, enabling flexible block-based editing and powering core content creation — driving a 27.25% MAU increase for Tier 0 customers
- Led quarterly AI DevEx initiatives across engineering — from foundational agentic rules and guardrails to fully agentic workflows and autonomous background agents; doubling adoption quarter over quarter; awarded "AI Champion"
- Developed the AI-agent-to-editor integration, implementing real-time diff rendering of AI-generated content in the block editor, as part of the Skunkworks AI Innovation Unit
- Led design system efforts across teams, integrating accessible headless component primitives to ensure UI consistency and accelerate development workflows
- Drove a cross-team testing initiative that established scalable setup, team enablement, and comprehensive unit, component, and E2E coverage, reducing regressions and accelerating deployments

Four of them LLC — Croatia / Germany / remote
Frontend Developer — Aug 2021 – Jun 2024

- Implemented core functionality for a pharmaceutical e-commerce platform serving millions of users, rebuilt from the ground up using Nuxt 3 and TypeScript, including authentication, API response caching, optimistic updates, and server-side rendering
- Shipped interactive web components based on an island architecture, used in hundreds of pharmacy sites across Germany
- Built an accessible custom component library from the ground up using Vue 3, Tailwind CSS, and Storybook, adopted as the standard across all core products
- Revamped complex forms and dynamic scheduling features using Vue Composition API and Tanstack Query
- Drove tech debt initiatives across core systems, refactoring for long-term maintainability and performance

Infokarta — Croatia / remote
Frontend Developer — May 2021 – Jul 2021

- Developed an interactive web GIS platform enabling local governments to visualize, analyze, and manage spatial data for urban planning, asset tracking, and public services
- Optimized complex SQL queries, significantly improving data processing speed and application performance

SKILLS

Languages & Frameworks: TypeScript, Vue, Nuxt, React, Node.js, Bun, Python
Libraries & Tooling: Tailwind CSS, Radix UI, shadcn/ui, Apollo GraphQL, TanStack Query, Pinia, Tiptap, Zod, Vitest, Testing Library, Playwright, Storybook, Vite

AWARDS & ACHIEVEMENTS

Best Project & Best Design
TVZ MC2 — 2022
Won top honors at Croatia's leading student programming competition in mobile, web, and IoT development

EDUCATION

Zagreb University of Applied Sciences • TVZ — Croatia
Bachelor of Software Engineering — 2019 – 2023

- Competed at multiple student programming competitions
- Secured STEM scholarship in recognition of outstanding performance
- Cumulative GPA: 4.75/5.00
